2X30001	XL1 Long Alias Column Heading Mishandled	12/14/22	
	o Field alias (alternate) names longer than the DDS maximum of 30 characters can be created using SQL. When long alias (alternate) names were present in a file and when COLHDG(*ALIAS) or COLHDG(*ALIASBLD) were specified, the column headings were truncated and erroneous data introduced. The problem has been corrected.
